Washington, DC 20004-3302

Subject: Notice in Accordance with TSCA Section 8(e): Results of a toxicity study with an experimental pesticide on aquatic water plants (*Lemna gibba*)

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of a toxicity test with [REDACTED] on aquatic water plants (*Lemna gibba*), conducted by [REDACTED] conducted by [REDACTED] (NON-GLP Indicator Study). The test substance is an experimental pesticide.

The test was conducted in a static system over 7 days according to the following test guidelines: "OECD Guideline for Testing of Chemicals, No. 221: *Lemna* sp., Growth Inhibition Test

The following nominal concentrations were tested: **control, 0.1, 0.4, 1.6, 6.4 and 25.6 µg/L**. All test solutions were visibly clear over the entire exposure period. The test substance is an active ingredient. Analyses were not carried out.

The following effect concentrations were obtained based on nominal concentrations:

| <u>Growth rates based on frond number</u> | | |
|---|---|------------------|
| NOEC | = | 0.40 µg/L |
| E_rC₁₀ (7 d) | = | 0.59 µg/L |
| E_rC₅₀ (7 d) | = | 2.09 µg/L |

| <u>Growth rates based on biomass</u> | | |
|--|---|-------------------|
| NOEC | = | 0.10 µg/L |
| E_rC₁₀ (7 d) | = | 0.05 µg/L* |
| E_rC₅₀ (7 d) | = | 2.08 µg/L |

| <u>Yield based on frond number</u> | | |
|--|---|------------------|
| NOEC | = | 0.40 µg/L |
| E_yC₁₀ (7 d) | = | 0.74 µg/L |
| E_yC₅₀ (7 d) | = | 1.33 µg/L |

| <u>Yield based on biomass</u> | | |
|--|---|-------------------|
| NOEC | = | 0.10 µg/L |
| E_yC₁₀ (7 d) | = | 0.08 µg/L* |
| E_yC₅₀ (7 d) | = | 0.48 µg/L |

*extrapolated value by ToxRat; i.e. under the lowest tested concentration

Explanation:

The **NOEC** is the highest concentration tested with no statistical significant deviation compared to the control

The **EC₅₀** is the concentration calculated at which the growth rate "r" resp. the yield "y" is inhibited by 50%.
